Ulysses Ochoa

Fresno, California | (559) 352-0497 | ulysses.ochoa02@gmail.com | ulyssesochoa.com| GitHub | LinkedIn

EDUCATION

California State University - Fresno
B.S. Computer Science | Advanced Cybersecurity, Certificate of Special Study December 2024

- **Relevant Coursework**:
  System & Computer Security, Applied Biometric Security, Internetworking Systems and Protocols, Data Structures and Algorithms, Computer Organization & Operating Systems, Discrete Mathematic, Deep Learning, Computer Graphics & Game Development

WORK EXPERIENCE

Firebaugh Las Deltas Unified School District Firebaugh, CA June – August, 2016 – 2019, (Volunteer) 2025
Information Technology / General Laborer

- Diagnosed and repaired hardware and software issued on computers, enhancing device functionality and user productivity
- Performed regular maintenance and updates on computer systems to ensure optimal performance and security compliance
- Provided technical support to staff, troubleshooting IT issues and delivering timely resolutions to minimize downtime
- Managed data backup processes to protect sensitive information to ensure optimal performance and security compliance
- Installed and configured wireless access points to expand network coverage and improve connectivity for end users
- Organized, cleaned, and rewired Intermediate Distribution Frame (IDF) and Main Distribution Frame (MDF) closets for improved network efficiency and ease of access

TECHNICAL KNOWLEDGE

Languages: C++, Python, SQL, HTML, CSS
Systems: Windows, Linux, Mac OS
Applications: Visual Studio Code, Autopsy, FTK Imager, Xcode, Git**,** GitHub, Microsoft Office, Adobe Photoshop

PROJECTS

Digital Forensic Investigation of an EnCase Disk Image (Autopsy, Sleuth Kit) | Forensic Analyst
Github Link: https://github.com/uly0-0/Digital_Forensics-EnCase_Image_Analysis Dataset: NIST CFReDS Forensic Test Image

- Established and maintained chain of custody documentation for an E01 forensic disk image, verifying MD5 and SHA-1 hash integrity before and after acquisition to ensure evidence admissibility standards were met
- Conducted forensic examination using Autopsy and Sleuth Kit to recover deleted files, extract email artifacts, analyze file system timelines, and identify suspicious executables from a simulated criminal investigation image
- Documented and preserved digital evidence using a structured case directory with segregated original and working image copies, and produced a formal written forensic examination report detailing findings, methodology, and evidentiary conclusions

Phishing Website Detection Using Multilayer Perceptron (MLP) and Feature Engineering (Python) | Developer

- Developed a multilayer perceptron (MLP) model using Python and TensorFlow to classify phishing websites with a 95-97% accuracy
- Evaluated the model using precision, recall, F1-score, and ROC-AUC metrics
- Collaborated on project documentation, presenting results in a Jupyter Notebook for academic review and reproducibility

Archivr - Media Recommendation Web App (SQL, Cloud) | Database Developer
GitHub Link: https://github.com/Junqor/Archivr

- Configured and deployed a cloud server on Digital Ocean to support back-end and database requirements, optimizing for remote team access
- Set up and managed an SQL database for media indexing and user data, ensuring secure authentication and efficient data retrieval
- Implemented remote access configurations for seamless team collaboration, including secure connection protocols

Languages: English (native), Spanish (native)
